

12 LINE SCHEMATIC

This line schematic is only for illustration purposes.

13 LINE LENGTH

The total line length has to be measured under a tension of 50N. The difference between the measured length and the original length should not exceed ± 10 mm.

Compliance of the test sample's suspension lines, brake lines and risers were checked by the testing laboratory after the test flights were completed.

Total line length PACE size: 70+, 85+ and 95+: www.skywalk.info

Single line length PACE size: 70+, 85+ and 95+: www.skywalk.info
